

STOP Animal Testing!

Animals are being blinded, paralyzed, and experimented on, and it's completely legal. Animal testing is when beauty products, experimental drugs, poison, and surgeries are tested on animals. It causes them lots of pain, long term injuries, mental problems, and can even kill them. It's completely unnatural that chemicals are injected into their blood, and to have to endure the long-lasting pain of being experimented on. According to PETA, there are no laws protecting the animals, the CEO of the company gets to decide how well the animals are treated.
